

ADEKA in Our Lifestyles

Since its foundation, the ADEKA Group has continued to develop proven technologies now used for many aspects of our daily lives. We remain committed to bringing together all of these technologies toward developing new products and technologies vital for a healthy, affluent society and the environment.

1 For Healthy Lives

Surfactants
Body and facial creams, emulsions, lotions, etc.

Propylene glycols
Detergents, shampoos, pharmaceutical products, etc.

5 On Your Favorite Bread

Margarine, shortenings, etc.
Making baked goods fluffy and moist

6 In All Corners of the Office

Polymer additives (flame retardants)
Improving the flame retardant property of plastics

Hydrogen peroxide
Bleaching of raw materials used in papermaking, etc.

2 Used as Paint for Construction and Civil Engineering

Epoxy resins, urethane resins
Anticorrosive, dust-proof paint for metals and concrete

3 On Your Cars

Polymer additives
Reducing the weight of vehicles

Lubricant additives
Improving fuel efficiency and reducing CO₂ emissions

4 On the LCD Screens of Flat-Screen Television Sets

Flat panel display materials
Enhancing the performance of video equipment

Photo (Light)/Thermal curing resin
Innovation of manufacturing technology

7 On Your Smartphones

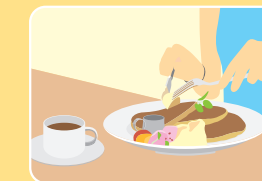

Semiconductor materials
Enhancing the performance of electronic equipment and reducing power consumption

Circuit materials
Improving the quality of optical communication equipment

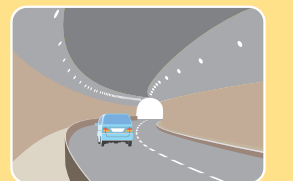

8 In Delicious Desserts, Too

Whipping cream, etc.
Improves the milky flavor and melt-in-the-mouth texture that makes desserts moist and delicious

9 Building Infrastructure that is Stronger and More Robust

Water swelling sealing materials
Sealing materials, used in concrete structures, to prevent water leakage, etc.

Chemicals Business

IT Related Chemicals

The ADEKA Group provides products for various electronic devices such as LCD TVs, PCs, and smartphones, using cutting-edge technologies. In particular, its semiconductor materials are at the highest level of quality in the world.

- Semiconductor materials
- Photo (Light)/Thermal curing resin
- Display materials
- Circuit materials

Functional Chemicals

Polymer additives are essential for highly-functional plastic. As an all-round manufacturer for polymer additives, the ADEKA Group manufactures various kinds. The Group also provides additives for automobile engine oils, developed with ADEKA's unique technology, as well as highly-functional cosmetics materials.

- Polymer additives
- Surfactants
- Lubricant additives
- Epoxy resins, urethane resins

Commodity Chemicals

From daily necessities such as soaps and detergents to IT electronics, the ADEKA Group provides products for a wide range of fields while contributing to the development of industries. Also, we were first in Japan to produce propylene glycols, used for cosmetics.

- Propylene glycol
- Hydrogen peroxide
- Water swelling sealing materials

Food Business

Guided by our brand slogan, "The Delicious Taste You Can Rely On," ADEKA develops food ingredients that are constantly at the forefront of the industry. We provide processed oil and fats as well as processed foods to bread, confectionery, and pastry manufacturers while at the same time contributing to the realization of a safe, reassuring dietary life.

- Margarine, shortenings
- Fats and oils for chocolate
- Whipping cream
- Frozen pie crusts

Other

Our other business primarily includes the maintenance of ADEKA Group plants and facilities, design of various kinds of plants, logistics, and an insurance agent business. The Group provides services to customers in various fields and based on expertise related to those operations.

- Plant design and construction management
- Logistics
- Real estate
- Insurance agent

Consolidated Sales by Business
