

September 5th, 2013

ADEKA will attend three conferences and have a stand on K trade fair.

TOKYO JAPAN – ADEKA Corporation (<http://www.adeka.co.jp/en/chemical/index.html>) is a leading Polymer Additives manufacturer offering a wide range of excellent polymer additives that provide plastics with amazing performance.

ADEKA will attend three conferences, Polyolefin Additives 2013 in September , SPE® TPO Automotive engineered polyolefins and ABC 2013(Annual Blow Molding Conference) in October.

Polyolefin Additives 2013

Polyolefin Additives 2013 is the 6th AMI international conference on polyolefin additives which reviews the state of the art in compounding and additivation of PP and PE in particular. It will take place on 10th-12th September 2013, Hotel Nikko, Düsseldorf, Germany and ADEKA will present a paper with the title **Ultimate nucleation and clarification technology for durable and non-durable polypropylene applications** on September 11th at 11:40AM.

SPE® TPO Automotive engineered polyolefins

SPE® TPO Automotive Engineered Polyolefins Conference, the world's leading automotive engineered-polyolefins forum, will be held in Detroit, U.S.A. on October 6th -9th 2013. ADEKA will present a paper with the title **Advanced Nucleating Agent for Light Weighting of PP and TPO parts for Automotive Applications** at this conference on October 8th at 15:30.

ABC 2013 (Annual Blow Molding Conference)

This conference will be held in Atlanta, U.S.A. on October 8th and 9th, 2013 and will feature industry speakers representing both packaging and industrial applications segments. ADEKA will present a paper with the title **Novel nucleating agent for PET allows down gauging and improved productivity** on October 9th at 09:30AM

K trade fair 2013 (K 2013)

K 2013 is the largest international trade fair for plastics and rubber worldwide. At K 2013 ADEKA and ADEKA PALMAROLE SAS, the subsidiary of ADEKA in Europe, will have a stand to exhibit a wide range of remarkable polymer additives including: Nucleating agents/Clarifiers, Light stabilizers, UV absorbers, Halogen free Flame Retardants, Specialty

Antioxidants, Masterbatches, PVC Stabilizers & Plasticizers.

- * **Place** Düsseldorf Fairgrounds
- * **Period** October 16th – 23rd , 2013
- * **Booth No.** Hall 6 Stand A11
- * **Web Site** <http://www.k-online.de/>

One of the product ranges that will be especially highlighted is ADEKA's Nucleating and Clarifying agents. These products give high degree of crystallinity to polymers resulting in increased mechanical properties such as stiffness, HDT etc, and improved optical properties and in particular transparency.
