

## ADEKA to Join Plastindia 2015

ADEKA Corporation, a Japan-based leading polymer additives manufacturer, announced to showcase their strong line-up of Polymer Additives at Plastindia 2015 plastics and rubber trade show in Gandhinagar, Gujarat, India in February.

### **Plastindia 2015**      [Official Site](#)

- Date:            February 5 Thu – 10 Tue, 2015  
Place:           Mahatma Mandir Convention and Exhibition Center  
Booth:           - Hall 10, Booth 10R-F4  
Product:        - Nucleating and clarifying agents for polypropylene  
                      - HALS for automotive interior and exterior parts  
                      - Process stabilizers for polyolefin and engineering plastics  
                      - PVC stabilizers and plasticizers  
                      - Plasticizers for Rubber  
                      .. and more

ADEKA Corporation, a Japan-based leading polymer additives manufacturer, was established in 1917 in Tokyo, having nearly 100 years of experience in the chemical industry. We have a wide product lineup in polymer additives field such as:

- Antioxidant from commodity to specialty
- Nucleating agent / Clarifying agent for PP, including for food packaging
- High performance HALS and UVA
- Environmental friendly PVC stabilizers/plasticizers

ADEKA group has 14 companies in 11 nations for polymer additives business, enhancing market development globally. Following Plastindia 2015, we are going to join the following other trade fairs:

- Chinaplas 2015 in Guangzhou, China
- Feiplastic 2015 in San Paulo, Brazil

We are looking forward to seeing you at our booth.
