

【Exhibition】「neo functional material 2015」

Jan.28 - 30, 2015, Tokyo

ADEKA will participate in “neo functional material 2015”. [Official site](#)

This exhibition is an integrated exhibition for functional material and will be expected to match between the latest available technology and product development through these consecutive exhibitions which covers a wide range of market places, from electronics, biotechnology, and communications technology to the medical/health, environment, and energy fields.

We will introduce our various high-quality and high-performance materials as below.

<Exhibition Information>

1. Date : January.28 - 30, 2015 10:00-17:00
2. Place : [Tokyo Big Sight \(Tokyo International Exhibition Center\)](#)
3. Booth No.: West 2B-13 [Floor Map](#)
4. Exhibiting Products :
 - Halogen-free waterborne flame retardant urethane resin
 - Water-Oil-repellent/hydrophilic waterborne urethane resin
 - High flexibility waterborne urethane resin
 - Hydro gelator for cosmetics
 - High refractive index coating resin
 - Adhesive resin for display device
 - Metal surface treatment agent
 - High heat resistance and thermal conductive insulation sheet
 - High heat resistance silicone reflector
 - Hindered amine light stabilizer
 - Non-halogen flame retardant for polyolefin

We look forward to seeing you at our booth.
