
ADEKA to Join IRC Rubber & Elastomer Technical Exhibition

ADEKA CORPORATION will join Rubber & Elastomer Technical Exhibition at Kitakyushu city, Japan in October.

IRC Rubber & Elastomer Technical Exhibition [Official Site](#)

Date: Oct 25 (Tue) – 28 (Fri), 2016

Place: West Japan General Exhibition Center Annex
Kitakyushu city, Fukuoka, Japan [Access](#)

Stand: No. 34

Seminar: Oct 27 (Thu) 15:00-15:30 S1 site

title "Advanced hindered amine light stabilizer for polyolefin elastomer"

We will show our latest knowledge of HALS for elastomer application.

Product: -- Plasticizers for rubber
-- Light stabilizers and UVA for elastomer
-- Intumescent flame retardants

IRC (International Rubber Conference) is one of the most important academic conferences around rubber and elastomer industry. This year IRC and the exhibition are held in Japan for the first time in the last 11 years.

We will show our technical knowledge and product information for rubber and elastomer application in our booth and technical seminar.

- Plasticizer for rubber "ADK CIZER" series
Meet various needs from heat/cold resistance to anti migration etc
- Light stabilizers and UVA "ADK STAB" series
Offer the suitable formulation for your application
- Intumescent flame retardants "ADK STAB FP" series
Low smoke, low CO, halogen free flame retardants which do not harm the property of elastomers

We are looking forward to meeting you at the venue.
