

ADEKA to Join “7th Fire Retardants in Plastics” in USA

ADEKA CORPORATION, the Japan-based leading polymer additives manufacturers, will give a lecture in the annual conference “7th Fire Retardants in Plastics” held by AMI (Applied Market Information LLC).

7th Fire Retardants in Plastics [Official Site](#)

Date: 25-26 April, 2017

Place: The Westin Convention Center Pittsburgh, Pittsburgh, PA, USA

Title: Advanced Halogen-Free Flame Retardant System for High Thermal
Stability Polyolefin Applications

Time: 9:40-10:10, 26 April

This annual international conference has now become an essential place to access the latest technology and information around flame retardant for plastics. In the lecture we will show the technical data for highly weatherable and thermal stable flame retardant system, which is highly required in the market recently, with the detailed formulation. We believe this presentation will surely be a great help for high performance flame retardant material.

With our high quality and environmental friendly polymer additives, we continuously offer the best solution for the plastic industry.

We are looking forward to seeing you at the venue.
